## **In Search of a New Home**

In the Milky Way galaxy lies a solar system with eight planets. The fifth planet from the sun is the gas giant named Jupiter. In one of its moons named Europa lie an alien civilization which is unheard of. These aliens are the size of humans, with two small eyes, a big nose, an unfriendly smile and green bodies with four big limbs, two on their bottom and two at the starting of their backbone. The language of the aliens is unique as they know all the other different languages the other aliens of their species speak. They usually speak the peculiar song type melodious language which is very pleasing to the ear. Their brain, enhanced with a processing chip and larger in size, makes them wiser and sharper than the average human. They are technology experts and have made major technological improvements compared to humans. The aliens read and memorize any book they find within seconds. These aliens are atheists and rarely go to war between themselves. Humans are ignorant of aliens living in Europa. The aliens have technology which hides their existence from other living beings, making it almost impossible for humans to invade Europa.

With trees towering as high as skyscrapers and seas as blue as the sky on Earth, Europa is filled with an unimaginable beauty. Europa even has mile-long waterfalls where the water flows backwards and high sand-capped mountain peaks which are extremely hot. Since there is a proper drainage system with a vacuum technology which makes the system better and efficient, Europa smells fresh and clean. As the land area in Europa is inadequate so the aliens built sky cities with floating buildings. Filled with lush green gardens and modern floating high-rise towers with hundreds of windows reaching the sky, the city Muston is home to millions of aliens. The aliens travel by their own means of transport like hovering cars that travel at the speed of light.

In Muston, lives a boy adopted by the Duke of Muston, named Yuwi Astalin. He has light green eyes and dark green hair and loves sleeping during his free time. His parents died after a meteorite fell from space and killed them. Yuwi still remembers the pain of losing his parents. He decided from then on that he would be an astronomer and save lives of many by warning them in Europa if anything terrible comes from space.

One day, Yuwi was going to work from Muston to the city of Forjis on the daily shuttle (which travels in the speed of light). He works at the SROE (Space Research Organization of Europa) as an astronomer. The SROE campus is a small sky city with tall buildings almost touching the sky. They have separate buildings for each different department. Yuwi works with his best friend Ziwi Bosan who has dark brown hair and black eyes. He is very thin and has no muscles. They both are the same age of 60 and do almost everything together. They go into their observatory room, Room Number 567, with the humongous metal and glass telescope in it. This telescope can see for billions of kilometres away and is called Scala. As they began to look into the telescope Ziwi said as he did everyday "Time to search the stars", Yuwi stopped him and said "Look, Ganymede has been ripped apart!". Then Ziwi took a look and said in disbelief "One of the chunks is coming towards Europa". They take their discovery to the main hall where the General's (who is the head of the SROE) office is and shout "Ganymede has been hit by an asteroid and has been ripped apart. One of the mighty huge chunks is coming towards Europa." Then XAISHA, an alien with orange dyed hair and forest green eyes, who hated Yuwi from when they were at school, came along. He took both of them to the General of SROE and said "These two have been disturbing us by screaming some nonsensical rubbish" and left the room by slamming the door. The General asks them "What is the matter with you guys?" They told him all the things they discovered. They walked with the General to room 567. The General shut the door after they entered before he went to use Scala. Yuwi suddenly gets extremely nervous right after the doors are shut. He begins to wonder if he got it wrong. If so, the General could fire him. Yuwi shuts both his eyes tightly and covers them with his hands until the General mutters after opening the door "Yuwi and Ziwi are right! We are going to get hit by one of those chunks." The SROE employees and Scientists who were in the hallway were shouting in fear until the General came back fifteen minutes later after calculating it with some officials saying "We have nine months until collision."

At that moment the officials SROE knew they couldn't evacuate everyone in Europa. The aliens also had to find where they could make their new home. They knew as other moons and planets were uninhabitable, they had to take the obvious decision of going to Earth. Yuwi knew that if they had to go to Earth, they would have to be armed. They knew the existence of humans after the humans sent various probes to Jupiter. The aliens even sent probes to Earth and they had learned a lot about life in Earth.

The General frantically went to the spaceship department run by 780 elite alien scientists in design and asked them to build a spaceship which could hold the whole population of Europa. After he had calmed down and told them the situation, the department said "We can only hold half of the population in the spaceship. We need durable material which can withstand high temperatures of the sun's heat but we have very inadequate quantities of the metal. If we stuff

the whole alien population into the spaceship, it will be too heavy and the spaceship won't fly." The General had expected them to say this. He knew that asking them would result in such a problem, but thought it was better to try anyway. He was aware that he had to tell the whole of Europa that only one half could be evacuated and that the other half would die. He wasn't ready for this so he asked Yuwi to tell the very sad news to Europa as he had made the discovery. He had to go to the press and tell them about the discovery and what the SROE was going to do.

Now the SROE had to decide which half to choose. The debate was happening in the conference room led by the General. A conclusion was reached that it would only be fair if the young and the middle aged(new born to 80 years old) are the half to get onboard the spaceship and survive.

When the spaceship to hold the half of the population was being created, Yuwi had gone to his stepfather Duke Kili if he was fine with staying here in Europa while the others were evacuated as he was old (he was 85). He asked "Dad, you have heard of the situation of the old aliens staying right here in Europa. Are you willing to stay?" He replied back "I am not staying here! I am coming with you and the others to Earth" before Yuwi could say anything Duke Kili said "Duke's orders".

The spaceship had finally been finished just 1 month before the asteroid destroyed Europa. Those who were chosen to go to Earth in Europa started crying and hugging their relatives before going to Forjis where the spaceship was waiting for its takeoff. The spaceship, named Interstellar in the alien language, was gigantic. It had three big engines (two at the sides and one on top), that enabled it to travel at the speed of light and was capable of horizontal takeoff. It was painted in a very bright white color that would reflect the sun's light. The boarding of the selected aliens took 3 hours and the loading of the weapons took another 4 hours. Finally, the time had come to leave Europa. The aliens next to the s

paceship were crying as they watched the spaceship soar into space. It took 43 minutes for them to reach Earth. During this time the whole army that Europa had assembled were getting ready for the attack. Dressed in camouflaged suits, armed with tasers, long range guns and bombs, they were ready.

When they reached Earth in California, USA all the humans next to the landing site freaked out and ran away. Luckily the aliens landed on a barren land, causing almost no destruction. When General Mark Lukenburg, a general of the US army heard about this he knew it was his moment to strike. The strong and tall man with brown hair and blue eyes wanted to destroy the aliens. He took permission from US President Jake Murray to attack. He assembled his team, informed them about the situation and went to California for the attack.

For about 12 hours the aliens did not see anyone against them but on the 13<sup>th</sup> hour the army arrived led by General Lukenburg. Armed with guns and bombs the human army were ready to fire. Yuwi now told the alien army to hold their fire and told the young ones to find a safe place and hide in the sewers. General Mark shouted to the army “Charge” and the battle began. Many of the humans died despite the aliens’ bad fighting skills.

Meanwhile, most of the US population were protesting against this action. They were protesting right in front of the Whitehouse but still the President wouldn’t budge. He wanted to stick to this action. The aliens saved whoever were not against them in California.

But still the fight was not easy for the aliens they did not have good tactics and bad skills. Ziwi and Yuwi wanted to assassinate the President. They knew he was in the capital of the USA. They asked their fellow friends Ewyuri Copik and Jombar Rotinger for help and they were very happy to help. Ewyuri was thin and fit was very tall and young, while Jombar was tall and fat. They went to the nearest airport and disguised themselves as humans and headed to the capital, Washington DC.

At the moment in California the US army members were dying and calling for reinforcements. The next day, soldiers from Germany, South Korea and various other countries joined the war. General Lukenburg was still alive and leading the attack against the aliens.

In the meantime, in Washington Ewyuri, Jombar, Ziwi and Yuwi had arrived. They had acted as if they couldn’t speak and took a cab to the White House. They secretly went inside by sneaking through the poles. They almost got caught but hid just in time behind a wall. Yuwi took the lead and the other’s followed. They got inside the building beginning the plan to kill the president. Their only aim was to kill the President and no one else, but if they saw the guards come against them, they were ready to kill them. The President was at his desk signing papers. They were just about to enter when a guard saw them and screamed in fear and called the other guards to come with their guns. The aliens thought they were doomed until Jombar saw a secret room and hid there with the other aliens. When they saw the guards coming closer, they threw their grenade which killed all of them. The other guards came hearing this noise. One of the guards shot Yuwi on his leg and he couldn’t move, but Ewyuri had already killed the rest of the guards. So, they went into the Oval room where he was signing his papers but he was not there. They examined the room and saw a secret passage below the desk that was used to protect the President in case of an attack. They got inside, Yuwi being held by Ziwi. The aliens saw President Jake Murray escaping in the distance with his guards. Jombar threw a grenade but only the guards died. The aliens ran as fast as they could and surrounded the President. President Jake Murray knew that he would be killed. He pleaded with them “I am sorry for everything I did. Please spare me.” The aliens did not know what to do but at that moment Yuwi came and stabbed him right in his chest. Without knowing if he died or not, they ran away and took a plane back to California.

In California, the aliens were losing the attack and the news of the President dying reached the humans. Duke Kili was now crying after the decision he made of coming to Earth. He told the General of SROE who was still alive "I am so sorry. I shouldn't have come here. We could have won if I had stayed back, because a younger person could make a difference. I will fight for the us!" Before the General said anything Duke Kili ran and grabbed a bomb and threw it to the human side killing a majority of the soldiers. General Lukenburg was still alive and leading the army but after he got distracted by the news of the President dying, one of the aliens shot him right in his head killing him. The aliens rejoiced and killed the other soldiers, thus winning the war.

All the aliens were rejoicing and were happy after killing all the humans and Jombar, Ewyuri, Ziwi and Yuwi came back safely after killing the President. Then the General of SROE asked "What next?" without any clue. Ziwi said "We should build an island at the ocean where no humans will destroy us." They built an island just 100 km off the coast of California. They took just 3 months to build the island. The other aliens were hiding in the sewer until this was done as they knew the humans would destroy the spaceship which they did. They moved to their island and wanted to live peacefully but almost every day humans started coming to their island. The aliens thought they were a threat but these humans were only trying to help them. They warned the aliens with hand signals that some of the other humans would eventually go to war with them.

These humans were right. After sometime, some of the other humans began to fight against the aliens. But Yuwi got a genius idea of building a dome that would stop the missiles from coming into their island. They could see through the dome but nothing could get out of it or come inside it until the aliens gave permission.

The aliens were still making vehicles faster than the speed of light and floating cities which surprised the humans. They were curious after they saw these things and wanted to replicate it but only the aliens who could do this. The aliens gifted their technology to the humans, and the human race benefitted greatly from their presence on Earth.
